Re: Letter of Protection - our client Dana M. Linacre, DOB 06/14/1987, date of accident 03/03/2026

This firm represents Dana M. Linacre for injuries sustained in the motor vehicle collision of 03/03/2026. Her personal injury protection benefits are exhausted. In consideration of your agreement to provide reasonable and necessary medical treatment without requiring present payment, we agree to protect your charges for that treatment and to pay your bill from any settlement, judgment or verdict obtained on her behalf, subject to our client's approval of the disbursement and to any reductions agreed with you.

This letter is not a guarantee of payment by this firm. If there is no recovery, the patient remains responsible for your charges. Please send itemized statements with CPT and ICD-10 codes and copies of all records to this office as treatment is rendered, as required by section 768.0427, Florida Statutes.

This firm did not refer the patient to your practice. The patient was referred by her treating orthopaedic surgeon.

INFORMED CONSENT - EPIDURAL STEROID INJECTION

I consent to a left L4-L5 transforaminal epidural steroid injection under fluoroscopic guidance, with moderate sedation. The risks, including bleeding, infection, headache, increased pain, nerve injury, allergic reaction and temporary numbness or weakness, and the alternatives, have been explained to me and my questions answered.

PROCEDURE NOTE (page 1 of 2)

Date	07/01/2026
Procedure	Left L4-L5 transforaminal epidural steroid injection
CPT	64483-LT; 99152
Pre-op diagnosis	M51.26 lumbar disc displacement; M54.16 lumbar radiculopathy
Post-op diagnosis	Same
Physician	Owen Strathy, MD
Sedation	Moderate, midazolam 2 mg IV, 16 minutes
Estimated blood loss	None
Complications	None

Description

The patient was placed prone. The lumbar region was prepped and draped in sterile fashion. Under fluoroscopic guidance the left L4-L5 neural foramen was identified. After local anesthesia with 1% lidocaine, a 22-gauge 3.5-inch spinal needle was advanced to the safe triangle. Negative aspiration. 1.5 ml of contrast confirmed epidural spread along the L4 nerve root without vascular uptake.

Tel (813) 555-0181

Fax (813) 555-0182

PROCEDURE NOTE (page 2 of 2)

A mixture of 80 mg methylprednisolone acetate and 1 ml of 0.25% bupivacaine was injected slowly. The needle was removed and a bandage applied. The patient tolerated the procedure well. Pre-procedure pain 6/10, post-procedure 2/10.

Plan: follow up with referring surgeon in 4 to 6 weeks. Pain diary for 2 weeks.

POST-PROCEDURE DISCHARGE INSTRUCTIONS

- No driving for 24 hours after sedation. A responsible adult must drive you home.
- You may have temporary numbness in the leg for a few hours. Use caution walking.
- Ice the injection site 20 minutes at a time as needed. No baths or swimming for 24 hours.
- Steroid side effects may include flushing, trouble sleeping and elevated blood sugar for a few days.
- Call us for fever over 100.4 F, severe headache, new weakness or loss of bladder or bowel control.
